FAQs – Security Related

31. How secure is Cargills Bank Online Banking?

To ensure security of your account information and transactions, multiple layers of security have been built into Cargills Bank Online Banking.

- Secure Login – No one can access your account information without knowing your secret USER ID and Password.
- One-time password for all transactions – you authenticate every payment transaction using an OTP that is sent to your registered online number with Cargills Bank, to confirm the transaction is initiated by you.
- Automatic Time-out of Idle Connections: For security reason, if you stay on a screen inactively for more than 5 minutes, your Online Banking Services connection will be automatically closed. When this happens, you are required to re-enter your User Name and password to re-login after 8 Minutes in order to continue using the service.
- Automatic lock-out: Your user ID will be disabled or blocked by the system if there are several repeated invalid login attempts. You can re-activate your account by contacting the bank.

32.. How can I protect my account?

Here are some few tips for protecting your online account:

- Create a unique Username and Password for Online Banking. Both of these should be difficult for others to guess.
- Memorize your Username and Password – never write them down. And never share them with anyone.
- Refresh or change your Username and Password often.
- Strengthen your Password by avoiding personal information like birthdays or the names of pets. Instead, use a combination of letters, numbers and special characters.
- When you are finished banking online, click the "log out" link. Simply closing your browser window could allow access to your information the next time it's opened.

- Cargills will never send you an email asking for your account or Password information. If you receive such a message, do not respond to it in any way. Instead, please forward the email to us at onlinebanking@cargillsbank.com

For more information, please see < [online banking security tips](#) >

How do I know I am visiting a secure Internet site?

Internet Banking is accessed through a secured Internet site, which helps ensure your financial information remains private and secure. You will know you are at a secured site when you see the <https://> in the address field on your browser and the padlock symbol at the bottom of your screen.
